Sable Metals & Minerals 

APPLICATION FOR BULK SAMPLING ON THE FARM DOORNPOORT

Shareholders are advised that Gemsbok Magnetite (Pty) Ltd ("**the company**"), a subsidiary of Sable has submitted an application to the Department of Mineral Resources ("**DMR**") to amend its prospecting right to allow for bulk sampling in order to remove and dispose of iron ore, vanadium and magnetite from the Doornpoort property over which the company currently holds a prospecting right.

Once this permit is granted by the DMR, samples will be sent for metallurgical testing and analysis as a precursor to the conclusion of a suitable marketing arrangement with an identified buyer.

Further information can be obtained from the Sable presentation dated July 2014 to be found on its website: www.sablemetals.co.za.
